

PROFILE

INTRODUCTION

Since 1996, Opticonx has been innovating and manufacturing world class fiber optic connectivity solutions in support of the telecommunications industry. Our products support various market segments including Technology, Healthcare, Financial, Higher Education, Telecom, Government and Manufacturing.

Opticonx is a privately held, **woman owned small business enterprise** as certified by the State of Connecticut. All shareholders are employed by Opticonx and active in the day to day operations of the company.

WORLDWIDE HEADQUARTERS

We are located at:

Opticonx, Inc.
45 Danco Rd.
Putnam, CT 06260

Regional sales offices:

Phoenix, AZ
Boston, MA
Raleigh, NC

ABOUT

Our Xtreme product line includes our [Xtreme8](#), [Xtreme12](#), and [Xtreme+](#) products aimed at the data center market. Xtreme 8 and 12 systems are plug and play MTP based products for inside the data center. Our Xtreme+ product line is aimed at hyperscale data center applications.

Opticonx also manufactures products in support of our OEM partners. Products such as fiber optic cable, furcation tubing, breakout kits and private label solutions are engineered and designed in accordance with our OEM partner specifications.

By combining cable manufacturing, interconnect and dedicated engineering capabilities, Opticonx is best in class and first to market.

MANAGEMENT TEAM

The management team has been in place since the company's inception in 1996. All came with extensive experience in their area of responsibility.
